STAT MEMORANDUM FOR: [REDACTED]
Associate Director-Management
National Foreign Assessment Center

STAT FROM: [REDACTED]
Assistant Legislative Counsel

SUBJECT: Intelligence Charter Legislation

1. Here is the omnibus paper on S. 2525, the intelligence charter legislation. I believe we have taken into account all important substantive issues raised by the various Agency components; as the cover memorandum for your signature indicates, however, there will be further changes, and people should feel free to bring any additional concerns to our attention at any time.

STAT 2. Note that the longest papers are those on Titles I and IV, reflecting that these titles contain the bulk of the issues of primary concern to the CIA. Title II, of course, deals with security, CI and constitutional issues that are of critical concern to us also. These three papers, therefore, contain almost all of the substantive issues of concern to the Agency. We have included also a paper reflecting a few general concerns with S. 2525, as well as a copy of my earlier Principles Paper. [REDACTED] and I assumed primary responsibility for the papers on Titles I, IV, V and VI. We, of course, had substantial input on all titles from OGC; [REDACTED] OGC, drafted the Title II paper, and [REDACTED] also of OGC, wrote the Title III paper.

STAT

3. This material will form a basic "reference" volume for our continued charter work. I would also envisage that we will make these available to congressional staffers, as informal position papers for their use, as soon as possible.
